5. DEPARTMENT REPORTS

1. LEGAL

1.a

Village Attorney Ponzini stated there is nothing to report other than those items that he submitted in memorandum form and he is continuing to work on various matters with members of the staff and he stated that he is available for an Executive Session.

2. MANAGER

2.a Village Manager's February 16, 2021-Village Manager Robson read the following report:

- **Con Ed Work on American Legion** -
So, after many, many months/years of trying to get through to people at Con Ed to finish the work they told us they would do about 4 years ago, they are finally working on the upgrades to provide for redundancy for the Community Center, Library and ASVAC buildings in the case of a large scale outage. This will allow for easier restoration. That is the work going on right now on American Legion. I have asked for a timeline, but don't have that yet. But at least it's finally getting done!
- **Sewer Rents** -Apparently there are questions that some folks have regarding the sewer rent bills that went out for the second quarter. I encourage anyone with questions to start with the information that is on

our website at <https://www.ardsleyvillage.com/public-works/pages/sanitary-sewer-information> and if they require additional information, they should feel free to contact Village Hall at 693-1550. These bills will be going out quarterly and are funding all of our sanitary sewer costs. Sanitary sewer costs are no longer paid for through the General Fund via taxes. Town of Greenburgh Supervisor Paul Feiner previously put out a message that bills did not need to be paid, however, that was for Town residents only, not Village residents. The Town and the Village are working together to ensure that our respective residents are paying only to one entity for sanitary sewer services and we expect resolution on this issue within the next couple of months. Sanitary sewer bills for Village residents must be paid on time in order to avoid accumulating penalties and re-levy on Village taxes.

We are committed to addressing all the recommendations and making positive changes going forward.

CORONAVIRUS 2019:

The Coronavirus is still infecting people and the village has seen a steady uptick in cases so please wear your masks and follow the CDC recommendations listed below.

Prevention:

The best way to prevent illness is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventative actions to help the spread of respiratory disease including:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose & mouth.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- Follow CDC's recommendations for using a facemask.
 - CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19.
 - Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health works and people who are taking care of someone in close settings (at home or in a health care facility).
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing or sneezing.

If soap and water are not readily available, use an alcohol based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.

For information about handwashing, see CDC's Handwashing website:
<https://www.cdc.gov/handwashing/index.html>

For information specific to healthcare, see CDC's Hand Hygiene in Healthcare Settings:
<https://www.cdc.gov/handhygiene/index.html>

These are everyday habits that can help prevent the spread of several viruses. CDC does have specific guidance for travelers.

How to Protect Yourself & Others

- Older adults and people who have severe underlying medical conditions like

heart or lung disease or diabetes seem to be at high risk for developing serious complications from COVID-19 illness.

- Know how it spreads
- Between people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced when an infected person coughs, sneezes, or talks.
- These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.
