

Appendix H: Storm Drain Mapping Consortium

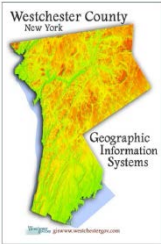

A complete map of the storm drain conveyance system is required by NYS Department of Environmental Conservation in order to effectively monitor stormwater quality and any illicit discharges that may enter the storm drainage system. The Village of Ardsley was fortunate to have the opportunity to participate in the Sleepy Hollow Mapping Consortium, funded by NYS DEC Grant C304394. The entire Village storm sewer system was mapped in November 2012.

Sleepy Hollow Mapping Consortium Westchester County MS4 Mapping Project DEC 01-C00077GG-3350000 was conducted to map runoff flow direction, stormwater Best Management Practices (BMPs) and municipal facility locations. The Project was completed 1/20/2020.

A guide to the storm system maps is shown below. Maps are shown as separate files in Appendix H.

The organizations that worked together with the municipality to complete this project include:

Contract Administrator: dolph rotfeld engineering, p.c. 200 White Plains Road, Tarrytown, NY 10591 (914) 631-8600	
	Merritts GIS, Ltd. 394 Bedford Rd. Pleasantville NY, 10570 914-769-8003
	BOWNE GROUP Bowne Management Systems, Inc. 235 East Jericho Turnpike Mineola, NY, 11501 800-540-2996
